

## social media at the department

Check out some of the Department's social media tools:

Similar to Facebook, **Corridor** allows anyone with an OpenNet account to network securely, effectively, and professionally at the Department.  
<http://corridor.state.gov>

**Diplopedia** is an online encyclopedia of foreign affairs information. It is a wiki, a multi page website that can be edited by users on OpenNet.  
<http://diplopedia.state.gov>

**The Sounding Board** is an online forum whereby Department employees can submit and share ideas with the Secretary.  
<http://soundingboard.state.gov>

**Communities@State** enables Department employees to form online communities to publish information, connect with others, and discuss issues.

## about the office of computer security

The Office of Computer Security (DS/SI/CS) enables cyber security for the Department of State's global information and information assets. DS/SI/CS monitors network traffic, detects and responds to incidents, and scans for security compliance and known vulnerabilities. In addition, DS/SI/CS assesses cyber security threats and emerging security technologies that ensure continued protection of the Department of State's technology assets.

For more information about cyber security, visit the Office of Computer Security website at:  
<https://intranet.ds.state.sbu/DS/SI/CS>

For more information about social media and social networking sites, check out the Office of Innovative Engagement's Social Media Hub:
